^{N1} Taste Gamagori Gourmet

Let's have Gamagori Gourmet!

A variety of fish, all fresh!

In the bay (approx. 10-20 m depth), Atsumi open sea (from approx. 30 m depth) and deep sea (from approx. 200 m depth). Different water depths have different water pressures. If the water pressure is different, it's a completely different world! The sea of Gamagori has the image of 3-story houses, 8-story condominiums, and 60-story skyscrapers crowded together in the same town. Gamagori is a town where three oceans are home, and where marine products that are not supposed to meet can be found without losing their freshness.

In fact, Gamagori is a town of deep-sea fish.

There are only four "offshore trawl fishing boats" in Aichi Prefecture that catch deep-sea fish. All of them belong to fishing ports in Gamagori City, making Gamagori famous for deep-sea fish. In fact, more than 90% of the deep-sea fish in the prefecture are landed in Gamagori. It is fatty and very tasty because it can withstand the water pressure of the deep sea. In particular, the deep sea off Mikawa Bay, where the rich nutrients of Mikawa Bay flow into the sea, is said to be one of the most blessed fishing grounds in Japan, and the deep-sea fish caught in Gamagori are reputed to be very delicious.

Landing fresh deep-sea fish

Fruits that take advantage of the mild climate are also delicious.

Very sweet and delicious!

Gamagori mandarin orange

With a warm climate surrounded by the sea and mountains, greenhouse mandarin oranges and outdoor mandarin orange cultivation are popular. You can enjoy various varieties of mandarin oranges throughout the year.

Only in a warm climate

Sunbury Gamagori

Gamagori has a lot of sunshine per year, and facility cultivation is thriving in the area. Please try a "red Jewel" that is the fruit of the growers' efforts.

Fried Mochikari (Greeneye) on the iron plate

Greeneye

Its name comes from its large blue eyes that appear to glow in the deep sea. A very tender and mild white fish, it is a typical fish in Gamagori.

Akazaebi (Japanese lobster)

This shrimp is endemic to Japan and lives at depths of 200 to 400 meters. It is a very high-end foodstuff because it cannot be farmed. The flesh is extremely soft and has a strong flavor and sweetness.

Princess of the shrimp world

Won the triple crown in a national competition for local udon noodles Japan's best local udon

Gamagori "udon"

Mikawa Bay is the largest clam production area in Japan. This is Gamagori's specialty udon with a rich clam soup and a rich scent of sea salt. You can enjoy a drink made with originality at each of the certified shops in the city.

Gamagori Onsenkyo Proprietresses' Association

We currently have 8 members. (as of April 2024)

A gathering of proprietresses of Gamagori Onsenkyo. We cherish our encounters with people and provide attentive hospitality from a woman's point of view. We will enliven Gamagori with our smiles and enthusiasm. We hold a hands-on program about once a month. For more information, please check the Gamagori City Tourism Association website.

Nigisu (Deepsea smelt)

Fried white fish in Gamagori is the fried nigisu. You can enjoy its deep flavor and refreshing taste. The dumpling soup is also very tasty.

It makes one have a good

Gamagori is proud of its fresh and delicious fish, and we hope that all citizens and visitors to Gamagori will enjoy the delicious fish. Gamagori City has turned the entire city into an aquarium.

enjoy!
